HOW TO USE THIS

1.1 Set it up

Clone the repository and cd into it:

```
git clone git@github.com:evildmp/vanilla-sphinx-test.git
cd vanilla-sphinx-test
```

Set up a virtual environment and install the dependencies. Dependencies are in `requirements.txt` - or to create and activate the virtualenv and install the requirements using the Makefile:

```
make install
```

Use `make html` to build the documentation, or better, have it served on port 8000 (it will refresh the page on every save):

```
make run
```

1.1.1 Content examples

This repository is a test-bed for development of a Sphinx implementation of the [Vanilla theme](#).

Repertoire of basic content

Heading

Sub-heading

Sub-sub-heading

Sub-sub-sub-heading

Sub-sub-sub-sub-heading

Sub-sub-sub-sub-sub-heading

Ordinary paragraph text. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Maecenas tempus, dui in pharetra luctus, turpis nisl rhoncus tellus, vitae gravida nibh odio nec diam. Fusce non mi ut odio accumsan ultricies ut nec

nulla. Phasellus nec odio sit amet neque dignissim tempor eget non ex. Aliquam sed lacinia lectus, eu congue est. Ut ac dignissim risus.

Code-blocks

```
@aperture.setter
def aperture(self, value):
    if value == "A":
        self.exposure_control_system.mode = "Shutter priority"

    elif not 1.7 <= value <= 16:
        raise self.ApertureOutOfRange

    else:
        self.exposure_control_system.mode = "Manual"
        self.exposure_control_system.aperture_set_lever.aperture = value

    self._aperture = value
```

Notes and admonitions

Note: Please turn the lights off if you are the last to leave.

Danger: Please turn the lights off if you are the last to leave.

Caution: Please turn the lights off if you are the last to leave.

As well as `note`, you can use `attention`, `caution`, `danger`, `error`, `hint`, `important`, `tip`, `warning`, `seealso`.

Security notice

The generic `admonition` directive allows you to provide a title, as above.
